VOLUME 16 1986

SUBJECT INDEX

^{125}I-[Sar^{1},Ile^{8}]-AII, 75
  angiotensin II binding
  autoradiography
  spontaneously hypertensive rats
Abnormal extracellular matrix, 825
  exencephaly
  trisomy
Acetylcholine (ACh)
  aggressive-defensive reaction, 491
  calmodulin inhibitors, 673
  cats, 491
  hypothalamus, 491
  lesions, electrolytic, 491
  ouabain, 673
  potassium, 673
  protein phosphorylation, 673
  trityustoxin, 673
  trifluoperazine, 673
Acetylcholine release
  dopaminergic fibres, 689
  GABA receptors, 689
  invasion of varicosities, 171
  myenteric plexus-smooth muscle preparation, 171
  noradrenaline, 171
  nucleus basalis, 689
Adrenergic neurons, 63
  cytofluorimetric scanning
  reserpine
  sciatic nerve
alpha Adrenergic system, 463
  medial preoptic area
  sleep-wakefulness
Adrenoceptors, 697
  growth hormone secretion
  preoptic anterior hypothalamus
  prolactin secretion
Adrenocorticotrophic hormone (ACTH), 541
  capsaicin
  cold stress
  restraint stress
Adrenocorticotrophic hormone (ACTH)-proopiomelanocortin, 107
  cerebral cortex
  lateral hypothalamic innervation
  α-melanocyte stimulating hormone (α-MSH)
Adrenomedullary response, 11
  age differences
  hypoglycemia
  hypoxia
  neonates
  splanchnic innervation
Age differences, 11
  adrenomedullary response
  hypoglycemia
  hypoxia
  neonates
  splanchnic innervation
Aggression, 179
  bed nucleus, stria terminalis (BNST)
  cats
  stimulation, electrical
Aggressive-defensive reaction, 491
  acetylcholine (ACh)
  cats
  hypothalamus
  lesions, electrolytic
Alpha rhythm, 439
  frequency detection
  microprocessor
  sleep spindles
  synchronized electroencephalogram (EEG) activity
D-Amino acid oxidase, 853
  aneuploidy
  neuroblasts
  postnatal rodent brain
  tissue culture medium
Amphetamine binding sites, 281
  appetite
  glucose
  hypothalamus
Aneuploidy, 853
  D-amino acid oxidase
  neuroblasts
  postnatal rodent brain
  tissue culture medium
Angiotensin II (AII)
  atrial natriuretic polypeptide (ANP), 745
  blood pressure regulation, 745
  drinking, 249
  route of administration, 249
Angiotensin II binding, 75
  autoradiography
  ^{125}I-[Sar^{1},Ile^{8}]-AII
  spontaneously hypertensive rats
Animal models, 803
  chromosomal localization
  comparative gene mapping
  Down Syndrome
  trisomy
Antidromic activation, 131
  prefrontal cortex neurons
  threshold hunter
Apomorphine, 161
  dopamine release
  freely moving rats
  haloperidol
  striatum
Apparatus
  ALZET® osmotic mini-pumps, 759
  amplitude discriminator, 131
  cryoprobe, 557
  latency discriminator, 131
  push-pull cannula, 149
  super-conducting quantum interference device, 549
  threshold evaluation, 131
Appetite, 281
  amphetamine binding sites
  glucose
  hypothalamus
  Area postrema, 5
  copper sulfate
  dimethylphenylpiperazinium (DMPP)
  nicotinic receptors
  vomiting
Arginine vasotocin (AVT)-administration, 391
  CSF 5-HIAA levels
  5-HT turnover
Atrial natriuretic polypeptide (ANP), 745
  angiotensin II (AII)
  blood pressure regulation
Autonomic function, 355
  human spinal cord
  kappa opioid receptors
  sensory function
Autoradiography, 517
  ^{125}I-[Sar^{1},Ile^{8}]-AII, 75
  angiotensin II binding, 75
  cochlear nucleus, 189
  dopamine receptors, 517
  histamine-H1 receptors, 205
  ^{3}H-mepyramine binding, 205
  peripheral nerve, 537
  Purkinje cell degeneration, 205
  receptor distribution, 189
  retrograde axonal transport, 537
  serotonin receptors, 517
  [^{3}H] spiperone, 517
  spontaneously hypertensive rats, 75
  strain differences, 205
  ^{3}H N-succinimidyl propionate (^{3}H NSP), 537
Autosomal aneuploidy, 789
  developmental consequences
  trisomy
Autosomal trisomy, 767
  introductory comments
  mental retardation
  neurobiologic consequences
Avoidance acquisition, 645
  p-chloroamphetamine
  memory retrieval
  retention
  serotonin (5-HT)
Axon terminals, 259
  diffuse agranular label
  horseradish peroxidase (HRP)
  membrane-bound granular label
  wheat germ-agglutinin-horseradish peroxidase (WGA-HRP)

Bar press-related neurons, 15
  dorsolateral prefrontal cortex
  monkeys
Basal forebrain
  basal ganglia, 603
  cholinergic limbic projections, 477
  cholinergic systems, 603
  lesions, basal forebrain, 477

pontomesencephalic tegmentum projections, 603
sexual behavior, male rats, 477
tectum, 603
thalamus, 603
Basal ganglia, 603
basal forebrain
cholinergic systems
pontomesencephalic tegmentum projections
tectum
thalamus
BASIC computer program, 759
osmotic mini-pumps
weight-adjusted pump filling concentrations
Bed nucleus, stria terminalis (BNST), 179
aggression
cats
stimulation, electrical
Behavioral effects
l-dopa, 561
1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), 561
monkeys, 561
neurotensin, 755
norepinephrine, 755
Parkinson's disease, 561
regional brain concentrations, 755
Benzodiazepine binding sites, 573
limbic system
radiography
Blood pressure regulation, 745
angiotensin II (AII)
atrial natriuretic polypeptide (ANP)
Brain
amygdala, 55, 755
anterior hypothalamic area (AHA), 681
anterior hypothalamus, 145, 477, 527
anterior insular cortex, 497
anterior thalamus, 603
area postrema, 5
basal amygdala, 477
basal forebrain, 477, 603
basal ganglia, 425, 517, 603
bed nucleus, stria terminalis (BNST), 179
brainstem, 281, 321
caudal brain stem, 121
caudal neurosecretory complex, 183
caudate nucleus, 425
caudate putamen, 145, 517, 603
central gray, 477
central medial thalamus, 603
cerebellum, 47, 205
cerebral cortex, 107, 321, 395, 689
cervical sympathetic ganglion, 713
cingulate cortex, 477, 573
claustrum, 517
cochlear nucleus, 189
corpus striatum, 321
cortex, 225, 399
diencephalon, 321
dorsal bundle, 47
dorsal hippocampus, 477
dorsal raphe nucleus, 469
dorsolateral prefrontal cortex, 15
dorsomedial hypothalamus, 231
entorhinal cortex, 477
entopeduncular nucleus, 603
fornix, 325
globus pallidus, 25, 603
habenula, 477, 603
hindbrain, 833
hippocampus, 19, 47, 107, 167, 299, 369, 483
hypothalamus, 93, 281, 309, 315, 321, 429, 491, 705, 755
inferior olivary nucleus, 739
infralimbic cortex, 497
insular cortex, 477
internal superior laryngeal nerve, 713
interpeduncular nucleus, 219, 477
jugular ganglion, 713
lateral geniculate, 603
lateral hypothalamus, 55, 107, 603
magnocellular preoptic nucleus, 477
magnocellular preoptic/ventral pallidal area, 603
mamillary nucleus, 477
medial habenula, 219
medial longitudinal fascicle, 183
medial prefrontal cortex, 127
medial preoptic area, 463, 469
medial septal nucleus/vertical limb of the diagonal band area, 603
mediodorsal thalamus, 603
mesencephalic locomotor region, 377, 383
midbrain, 833
midline thalamus, 545
motor cortex, 517
neocortex, 47
neostriatum, 33
nodose ganglion, 713
nucleus accumbens, 33, 145, 377, 517, 689, 755
nucleus ambiguus, 231
nucleus basalis, 689
nucleus tractus solitarius (NTS), 325, 497, 713
occipital cortex, 549
olfactory tubercle, 517
orbital gyrus, 497
parvocellular paraventricular nucleus, 231
periaqueductal grey, 127
pineal gland, 315
piriform cortex, 477
pons-medulla, 47
pontomesencephalic tegmentum, 603
posterior hypothalamus, 545
posterior nuclear area of the thalamus, 603
prefrontal cortex, 33, 155
preoptic anterior hypothalamus, 697
preoptico-anterior hypothalamus, 545
preoptic area, 429
pretectal/parafascicular area, 603
progesterone, 469
reticular area of the thalamus, 603
reticular nucleus of the medulla, 183
rostral brain stem, 121
septem, 145
stria terminalis, 491
striatum, 1, 49, 161, 331
subiculum, 477
substantia innominata, 477
substantia nigra, 603
subthalamic nucleus, 603
superior colliculus, 603
suprachiasmatic nucleus (SCN), 527, 681, 705
supraoptic nucleus, 681
tectum, 603
tegmental pedunculopontine, 377, 383
thalamus, 83, 155, 603
ventral hippocampus, 477
ventral tegmental area, 267
ventral tegmentum, 39
ventromedial hypothalamus, 477
ventro-medial mesencephalic tegmentum, 155
visual cortex, 661
zona incerta, 107, 383
Brain dopamine, 145
castration
testosterone replacement
Brain function, 549
diagnosis
epilepsy
magnetoencephalogram (MEG)
Brain stem projections, 183
caudal neurosecretory complex
HRP-EM study
Bombesin, 55
gastric acid secretion
gastric mucosal damage
lesions, amygdaloid
lesions, lateral hypothalamic
^{125}I-alpha-Bungarotoxin binding, 681
hypothalamus
in vitro
in vivo
morphometric evaluation

Calcium ATPase, 639
calcium channel
dihydropyridine
Mojave toxin
Calcium channel, 639
calcium ATPase
dihydropyridine
Mojave toxin
Calmodulin inhibitors, 673
acetylcholine (ACh)
ouabain
potassium
protein phosphorylation
tityustoxin
trifluoperazine
Capsaicin, 541
adrenocorticotropic hormone (ACTH)
cold stress
restraint stress
Castration
brain dopamine, 145
l-dopa, 1
dopamine receptors, 1
estrogen treatment, 1
testosterone replacement, 145
turning behavior, 1
Catalepsy, 25
ibotenic acid
lesions, globus pallidus
lesions, ibotenic acid-induced
locomotor activity
stereotypy
Catecholaminergic cell bodies, 341
immunohistochemistry
perikarya distribution
spinal cord
Catecholamines, 315
cysteamine effects
melatonin

pineal N-acetyltransferase (NAT)
somatostatin
thiol:disulfide exchange
Cats
acetylcholine (ACh), 491
aggression, 179
aggressive defensive behavior, 491
bed nucleus, stria terminalis (BNST), 179
caudate nucleus, 425
cortical projections, 497
EEG desynchronization, 121
EEG synchronization, 121
electroencephalogram (EEG), 545
encéphale isolé, 545
endogenous antipyretics, 99
fever, 99
functional recovery, 507
head turning, 425
horseradish peroxidase (HRP), 497
hypothalamus, 491
internal superior laryngeal nerve, 713
in vitro, 661
laminar distribution, 661
lesions, electrolytic, 491
locomotor activity, 507
α-melanocyte-stimulating hormone (α-MSH), 99
midline thalamic neurons, 545
neuromodulator receptors, 661
neuronal pathways, 497
neurotransmission receptors, 661
nucleus tractus solitarius (NTS), 497
posterior hypothalamus, 545
postnatal development, 661
preoptic neurons, 121
preoptico-anterior hypothalamus, 545
sensory-triggered movement, 425
spinal cord, 507
stimulation, electrical, 179
thermoregulatory mechanisms, 99
transganglionic projections, 713
visual cortex, 661
Caudal neurosecretory complex, 183
brain stem projections
HRP-EM study
Cerebral cortex
adrenocorticotrophic hormone (ACTH)-proopiomelanocortin, 107
cortical asymmetry, 395
lateral hypothalamic innervation, 107
α-melanocyte stimulating hormone (α-MSH), 107
prenatal stress, 395
sexual dimorphism, 395
Caudate nucleus, 425
cats
head turning
sensory-triggered movement
Cell-cell contacts, 723
fibroblast-free cultures
glial-enriched cell cultures
glial-fibroblast interactions
Cerebral vessels, 303
ganglionectomy
gerbils
perivascular nerves
p-Chloroamphetamine, 645
avoidance acquisition
memory retrieval
retention
serotonin (5-HT)
Cholecystokinin (CCK), 533
gonadotropin secretion
proglumide
Cholinergic limbic projections, 477
basal forebrain
lesions, basal forebrain
sexual behavior, male rats
Cholinergic systems, 603
basal forebrain
basal ganglia
pontomesencephalic tegmentum projections
tectum
thalamus
Chromosomal localization, 803
animal models
comparative gene mapping
Down Syndrome
trisomy
Chromosome translocation, 833
embryonic studies
neural tube closure defects
ultrastructural analysis
Circadian rhythm, 705
drinking
lesion placement
lesions, suprachiasmatic nucleus
locomotor activity
Circling, 267
dopamine systems
environmental stimuli
morphine
ventral tegmental area
Cochlea, 215
α-difluoromethylornithine (DFMO)
hearing
polyamines
Cochlear nucleus, 189
autoradiography
receptor distribution
Cold stress, 541
adrenocorticotropic hormone (ACTH)
capsaicin
restraint stress
Comparative gene mapping, 803
animal models
chromosomal localization
Down Syndrome
trisomy
Computer programs, 137
data processing
integration
Simpson's method
Copper sulfate, 5
area postrema
dimethylphenylpiperazinium (DMPP)
nicotinic receptors
vomiting
Cortical asymmetry, 395
cerebral cortex
prenatal stress
sexual dimorphism
Cortical projections, 497
cats
horseradish peroxidase (HRP)
neuronal pathways
nucleus tractus solitarius (NTS)
Cortical slices, 557
cryoprobe
neuronal inactivation
^{3}H-Corticosterone, 167
glucocorticoid receptor
hippocampus
in vitro
Cryoprobe, 557
cortical slices
neuronal inactivation
CSF 5-HIAA levels, 391
arginine vasotocin (AVP) administration
5-HT turnover
Cysteamine effects, 315
catecholamines
melatonin
pineal N-acetyltransferase (NAT)
somatostatin
thiol:disulfide exchange
Cytofluorimetric scanning, 63
adrenergic neurons
reserpine
sciatic nerve

Data processing, 137
computer program
integration
Simpson's method
Decortication, 733
FSH secretion
LH secretion
ovariectomy
plasma prolactin level
Dehydration, 415
drinking
intragastric saline load
intragastric water load
intraperitoneal saline load
intraperitoneal water load
isosmotic glucose
Developmental consequences, 789
autosomal aneuploidy
trisomy
Diagnosis, 549
brain function
epilepsy
magnetoencephalogram (MEG)
Diffuse agranular label, 259
axon terminals
horseradish peroxidase (HRP)
membrane-bound granular label
wheat germ-agglutinin-horseradish peroxidase (WGA-HRP)
α-Difluoromethylornithine (DFMO), 215
cochlea
hearing
polyamines
Dihydropyridine, 639
calcium ATPase
calcium channel
Mojave toxin
Dimethylphenylpiperazinium (DMPP), 5
area postrema
copper sulfate
nicotinic receptors
vomiting
(DOCA)-NaCl treatment, 93
hypertension
vasopressin release
l-Dopa
behavioral effects, 561
castration, 1
dopamine receptors, 1
estrogen treatment, 1
1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), 561

monkeys, 561
Parkinson's disease, 561
turning behavior, 1
Dopamine concentration, 751
electroretinographic B-wave amplitude
6-hydroxydopamine (6-OHDA)
intravitreal injection
rabbits
retina
Dopamine pathways, 33
footshock
laterality
locomotor activity
selective activation
Dopamine receptors
autoradiography, 517
castration, 1
l-dopa, 1
estrogen treatment
prolactin, 331
serotonin receptors, 517
[^{3}H]spiperone, 517
turning behavior, 1
Dopamine release
apomorphine, 161
freely moving rats, 161
haloperidol, 161
push-pull cannula, 149
striatum, 149, 161
Dopamine systems, 267
circling
environmental stimuli
morphine
ventral tegmental area
Dopaminergic fibres, 689
ACh release
GABA receptors
nucleus basalis
Dopaminergic neurons, 155
inhibitory influence
neuroleptics
prefrontal cortex
Dorsolateral prefrontal cortex, 15
bar press-related neurons
monkeys
Dorsomedial hypothalamic projections, 231
pancreatic hormone release
Phaseolus vulgaris leucoagglutinin (PHA-L) tracing
Double labeling, 399
raccoons
somatosensory system
thalamocortical projection
Down Syndrome
animal models, 803
chromosomal localization, 803
comparative gene mapping, 803
human trisomy 21, 773
mental retardation, 773
neurobiological studies, 773
trisomy, 803
Drinking
angiotensin II, 249
circadian rhythm, 705
dehydration, 415
intragastric saline load, 407, 415
intragastric water load, 407, 415
intraperitoneal saline load, 407, 415
intraperitoneal water load, 407, 415
isomotic glucose, 415
lesion placement, 705
lesions, suprachiasmatic nucleus, 705
locomotor activity, 705
pharmacologic induction, 407
route of administration, 249
Drug
acetylcholine, 149, 429, 491
amphetamine, 25, 377, 689
d-amphetamine, 149, 483
angiotensin II, 407
apomorphine, 25, 161, 689
benztropine, 149
bethanechol, 407
caffeine, 483
capsaicin, 541
p-chloroamphetamine, 645
clonidine, 697
clozapine, 517
cysteamine, 315, 331
diaminobenzidine, 259
α-difluoromethylornithine (DFMO), 215
dihydropyridine, 639
dihydroxyphenylacetic acid (DOPAC), 751
dimethylphenylpiperazinium (DMPP), 5
dipyrone, 99
domperidone, 331
l-dopa, 1, 561
dopamine, 751
E. coli, 99
eserine, 149
flunitrazepam, 573
fluphenazine, 155
glucose, 281
glutamate, 429
haloperidol, 25, 155, 161, 331, 517
halothane, 149
homovanillic acid (HVA), 751
6-hydroxydopa, 47
6-hydroxydopamine (6-OHDA), 751
5-hydroxytryptophan, 407
ibotenic acid, 25
imipramine, 483
isoprenaline, 697
isoproterenol, 407
levomepromazine, 155
methylphenidate, 483
l-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP), 561
metoclopramide, 517
morphine, 267, 363
^{3}H-morphine, 289
muscimol, 689
naloxone, 363
nitrendipine, 639
nitrous oxide, 321
noradrenaline, 429
norepinephrine, 463
pargyline, 149
pentazocine, 363
pentobarbital, 483
phenoxyphrine, 463
phentolamine, 697
picrotoxin, 377, 689
pipotiazine palmitic ester, 155
propranolol, 463
reserpine, 63
saralasin, 249
sodium glutamate, 377
spiroperidol, 155
sulpiride, 331
(±)sulpiride, 155
thioridazine, 517
Drug interactions, 363
metastatic tumor growth
morphine
naloxone
opiate receptors
pentazocine

EEG desynchronization, 121
cats
EEG synchronization
preoptic neurons
EEG synchronization, 121
cats
EEG desynchronization
preoptic neurons
Electrical stimulation, 299
hippocampal slice preparation
population spike
Electroencephalogram (EEG), 545
cats
encéphale isolé
midline hypothalamic neurons
posterior hypothalamus
preoptico-anterior hypothalamus
Electrophysiology, 527
excitatory amino acids
retino-hypothalamic pathway
Electroretinographic B-wave amplitude, 751
dopamine concentration
6-hydroxydopamine (6-OHDA)
intravitreal injection
rabbits
retina
Embryonic studies, 833
chromosome translocation
neural tube closure defects
ultrastructural analysis
Encéphale isolé
cats
electroencephalogram (EEG)
midline thalamic neurons
posterior hypothalamus
preoptico-anterior hypothalamus
Endogenous antipyretics, 99
cats
fever
α-melanocyte-stimulating hormone (α-MSH)
thermoregulatory mechanisms
Enteric neurons, 421
gamma-aminobutyric acid (GABA)
peripheral nervous system (PNS)
quails
Environmental stimuli, 267
circling
dopamine systems
morphine
ventral tegmental area
Epilepsy, 549
brain function
diagnosis
magnetoencephalogram (MEG)
Estrogen, 469
monoamine levels
priming actions
sexual behavior
Estrogen treatment, 1
castration
l-dopa

dopamine receptors
turning behavior
Euthermia, 289
ground squirrels
hibernation
^{3}H-morphine
Excitatory amino acids, 527
electrophysiology
retinohypothalamic pathway
Excitotoxin, 127
glutamate transmitter
lesions, N-methyl-D-aspartate
periaqueductal grey
Exencephaly, 825
abnormal extracellular matrix
trisomy

Fever, 99
cats
endogenous antipyretics
α-melanocyte-stimulating hormone (α-MSH)
thermoregulatory mechanisms
Fibroblast-free cultures, 723
cell-cell contacts
glial-enriched cell cultures
glial-fibroblast interactions
Field potentials, 553
frog optic tectum
in vitro
Flash evoked potentials, 225
lesions, superior colliculus
visual evoked potentials
Footshock, 33
dopamine pathways
laterality
locomotor activity
selective activation
Freely moving rats, 161
apomorphine
dopamine release
haloperidol
striatum
Frequency detection, 439
alpha rhythm
microprocessor
sleep spindles
synchronized electroencephalogram (EEG) activity
Frog optic tectum, 553
field potentials
in vitro
FSH secretion, 733
decortication
LH secretion
ovariectomy
plasma prolactin level
Functional recovery, 507
cats
locomotor activity
spinal cord

GABA receptors, 689
ACh release
dopaminergic receptors
nucleus basalis
Gamma-aminobutyric acid (GABA), 421
enteric neurons
peripheral nervous system (PNS)
quails
Ganglionectomy, 303
cerebral vessels
gerbils
perivascular nerves
Gastric acid secretion, 55
bombesin
gastric muscosal damage
lesions, amygdaloid
lesions, lateral hypothalamic
Gastric mucosal damage, 55
bombesin
gastric acid secretion
lesions, amygdaloid
lesions, lateral hypothalamic
Gerbils, 303
cerebral vessels
ganglionectomy
perivascular nerves
Glia-fibroblast interactions, 723
cell-cell contacts
fibroblast-free cultures
glial-enriched cell cultures
Glial-enriched, cell cultures, 723
cell-cell contacts
fibroblast-free cultures
glial-fibroblast cultures
Glucocorticoid receptor, 167
^{3}H-corticosterone
hippocampus
in vitro
Glucose, 281
amphetamine binding sites
appetite
hypothalamus
Glutamate transmitter, 127
excitotoxin
lesions, N-methyl-D-aspartate
periaqueductal grey
Glutamate uptake, 325
nodose ganglion
nucleus tractus solitarius (NTS)
vagal afferents
Gonadotropin secretion, 533
cholecystokinin (CCK)
proglumide
Ground squirrels, 289
euthermia
hibernation
^{3}H-morphine
Growth hormone secretion, 697
adrenoceptors
preoptic anterior hypothalamus
prolactin secretion
Guinea pigs
hemilabyrinthectomy
inferior olivary neurons
spinal cord transection
vestibular compensation

Haloperidol, 161
apomorphine
dopamine release
freely moving rats
striatum
Hamsters
lesions, dorsal midbrain, 39
lordosis, 39
somatosensory responsiveness, 39
superior laryngeal nerve, 271
Head turning, 425
cats
caudate nucleus
sensory-triggered movement
Hearing, 215
cochlea
α-fluoromethylornithine (DFMO)
polyamines
Hemilabyrinthectomy, 739
guinea pigs
inferior olivary neurons
spinal cord transection
vestibular compensation
Hibernation, 289
euthermia
ground squirrels
^{3}H-morphine
Hippocampal slice preparation, 299
electrical stimulation
population spike
Hippocampus

Thalamus, 603
basal forebrain
basal ganglia
cholinergic systems
pontomesencephalic tegmentum projections
tectum
Thermoregulatory mechanisms, 99
cats
endogenous antipyretics
fever
α-melanocyte-stimulating hormone (α-MSH)
Thiol:disulfide exchange, 315
catecholamines
cysteamine effects
melatonin
pineal N-acetyltransferase (NAT)
somatostatin
Threshold hunter, 131
antidromic activation
prefrontal cortex neurons
Timm's method, 19
histofluorescence
human brain tissue
Tissue culture medium, 853
D-amino acid oxidase
aneuploidy
neuroblasts
postnatal rodent brain
Tityustoxin, 673
acetylcholine (ACh)
calmodulin inhibitors
ouabain
potassium
protein phosphorylation
trifluoperazine
Topographical organization, 455
horseradish peroxidase (HRP)

olfactory bulb
olfactory epithelium
Topographical projections, 445
horseradish peroxidase (HRP)
olfactory bulb
olfactory epithelium
Transganglionic projections, 713
cats
internal superior laryngeal nerve
Trifluoperazine, 673
acetylcholine (ACh)
calmodulin inhibitors
ouabain
potassium
protein phosphorylation
tityustoxin
Trisomy
abnormal extracellular matrix, 825
animal models, 803
autosomal aneuploidy, 789
chromosomal localization, 803
comparative gene mapping, 803
developmental consequences, 789
Down Syndrome, 803
exencephaly, 825
mouse chimeras, 815
postnatal studies, 815
Trisomy 19 (Ts19), 845
postnatal development
retina
Turning behavior, 1
castration
l-dopa
dopamine receptors
estrogen treatment

Ultrastructural analysis, 833
chromosome translocation
embryonic studies
neural tube closure defects

Vagal afferents, 325
glutamate uptake
nodose ganglion
nucleus tractus solitarius (NTS)
Vasopressin release, 93
(DOCA)-NaCl treatment
hypertension
Ventral tegmental area, 267
circling
dopamine systems
environmental stimuli
morphine
Ventrobasal complex, 83
posterior complex
somatosensory responses
Vestibular compensation, 739
guinea pigs
hemilabyrinthectomy
inferior olivary neurons
spinal cord transection
Visual cortex, 661
cats
in vitro
laminar distribution
neuromodulator receptors
neurotransmitter receptors
postnatal development
Visual evoked potentials, 225
flash evoked potentials
lesions, superior colliculus
Visual tracking, 435
muscular activation patterns
phase plane
voluntary limb movements
Voluntary limb movements, 435
muscular activation patterns
phase plane
visual tracking
Vomiting, 5
area postrema
copper sulfate
dimethylphenylpiperazinium (DMPP)
nicotinic receptors

Weight-adjusted pump filling concentrations, 759
BASIC computer program
osmotic mini-pumps
Wheat germ-agglutinin-horseradish peroxidase (WGA-HRP)
axon terminals
diffuse agranular label
horseradish peroxidase
membrane-bound granular label
